PRECISION SUPPLY EXPANDS OFFICE

After experiencing a recent surge in business, Precision Supply has remodeled and expanded its office settings, doubling the number of desks and opening positions in almost every department. In December of 2007, Precision Supply acquired an account that would enable the company to continue its expansion across the United States and into Mexico and Canada. "We are very excited about all of our new business," said company President, Bob Koch. "This expansion was necessary and we believe will set the foundation for future growth as well."

Beginning as a cutting tools and abrasives distributor in 1974, Precision Supply has grown to be one of the largest Integrated Suppliers in the market offering everything from cutting tools and abrasives to janitorial and safety supplies. Along with their large product/market breadth offering, Precision Supply has continued to build upon their integrated services in inventory management, product sourcing and procurement, and technical innovation. Their hardware and software solutions are unmatched by any other distributor.

With this recent expansion Precision Supply sets the table not only for more growth and new business, but also for new entities and features for existing customers. Within the next month Precision Supply will release a new online catalog, making placing orders more convenient and easier than ever before. "Our business is headed in the right direction," said Koch. "I know our customers will reap the benefits of these changes and I am glad that we are in a position to be able to do that for them."

The office expansion and hiring of additional staff is scheduled to be completed by the end of the year.
