SUBJ: PRICE CHANGE ANNOUNCEMENT

DATE: 12/4/09

Continuing increases in cost dictate that our company must make price adjustments effective January 4, 2010. Conventional bonded products will increase on average two and one-half percent (2-1/2%). Superabrasive products will increase on average two percent (2%).

All orders received prior to January 4, 2010 that allow for shipment when ready will be billed at prices currently in effect. All orders received on or after January 4, 2010 will be billed at the new prices. Orders received prior to January 4, 2010 that specify future shipment dates will be priced at new price levels in effect at the date of shipment.

We regret the necessity of this price change at this time, but we remain committed to providing you, our customers, with the best value in abrasive products, along with the world-class service and application support you have come to expect.

We thank you for your past and future support of our companies and their products.

Sincerely,

Charles W. Tunt
President, Superabrasives Division
