

Valentine Announcement...

New ValCool VP Products

We are preparing to launch several new products over the coming months. We've seen great performance at our beta testing sites and will be rolling these products out to the market.

VP915 – Synthetic metalworking fluid.

A synthetic metalworking fluid developed for steel, iron and other ferrous materials. Provides good tool life and corrosion protection. We've seen good results in oilfield pipe, couplings, iron castings etc. It was developed to fit between the VP920 and VP910 in price and performance. Good competitive targets would be:

Fuchs Ecocool 1722

Castrol Syntillo 9902/9904

Milacron CimTech 100/280

Master Chemical Trim Clear/C270

VP 100RP – Corrosion Preventative

VP100RP is a very light oil-based corrosion preventative. The VP100RP is designed to be a fingerprint neutralizer, water-displacing corrosion preventative. It should be used to prevent corrosion on parts stored indoors for 6-12 months. The VP100RP is a replacement product for the VNT100.

ValCOOL VP Additives:

Some Distributor partners asked to have the additives crossover republished. It is shown below. The older VNT additives are listed with their newer VP replacements.

Old Part #	New VP Part #
VADFD130-005U	VADFD130VP-005U Foam Depressant 130
VADFD130-055U	VADFD130VP-055U
VADAF-005U	VADAFVP-005U Anti Foam
VADAF-055U	VADAFVP-055U
VADPH-005U	VADPHVP-005U pH Enhancer
VADPH-055U	VADPHVP-055U
VADCO-005U	VADCOVP-005U Cobalt Leeching Inhibitor
VADCO-055U	VADCOVP-055U
VCLAL-005U	VCLVP-005U Machine Cleaner
